Dataloader.io

Data loading is the first integration use case for many SaaS users. Dataloader.io allows Salesforce users to import, export and delete unlimited amounts of data for our enterprise.

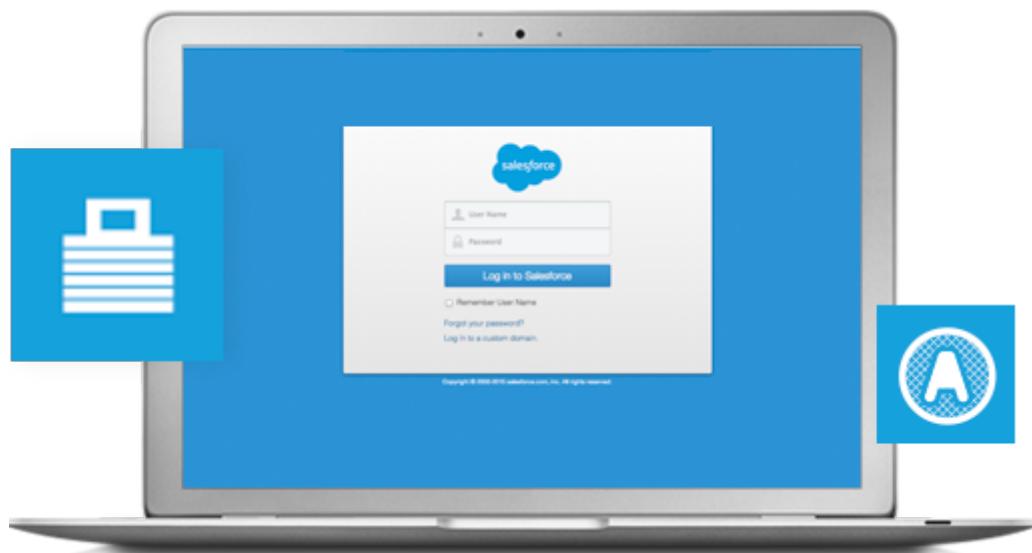

Dataloader.io is simple, free, no download required app for Salesforce. 100% cloud solution To quickly import, export and delete data in Salesforce.com.

- Login with Salesforce: Use our existing credentials, no security token is required.
- Data mapping is made easy : Forget drag and drop. Keyboard shortcuts help us to find and map fields quickly.
- Account Id lookup: Pull related object information such as AccountID's without using Excel VLOOKUP.

Dataloader.io is powered by CloudHub, an integration platform as a service from MuleSoft.

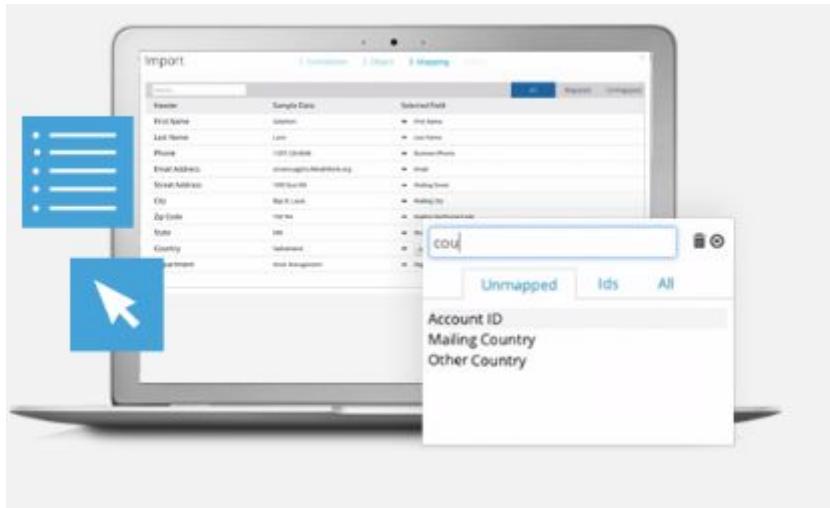

Simple and secure:

Use existing Salesforce credentials to log into dataloader.io without the hassle of downloading an application. Dataloader.io uses oAuth 2.0 so we can get started quickly without compromising security.

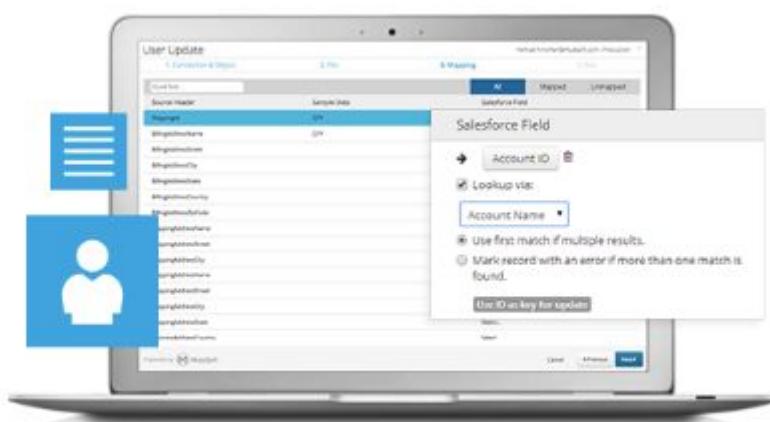

Intelligent data mapping:

Spend less time mapping data from the source file to the Salesforce fields with features such as auto-mapping, keyboard shortcuts and search filters

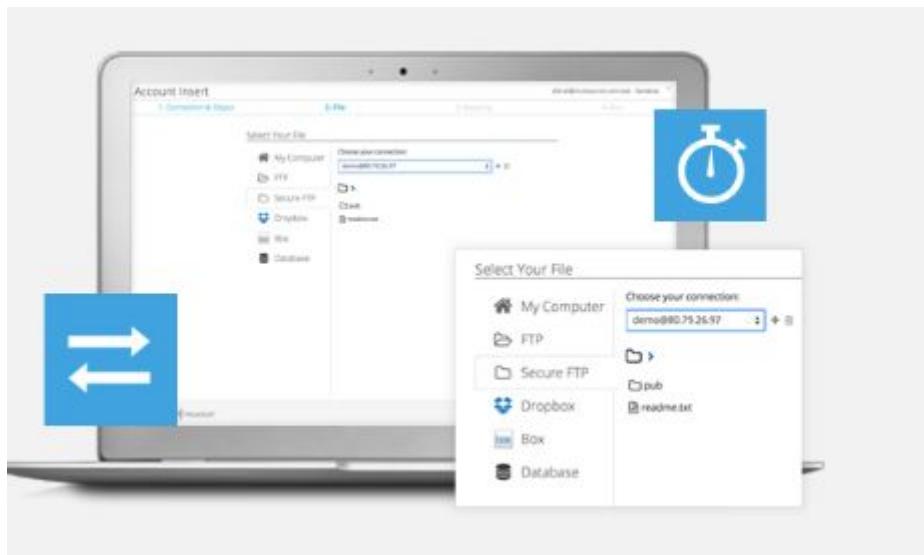

No more redundant work

Export related objects through a single pull, removing the manual and redundant work required to pull multiple datasets and reassociate them in Excel.

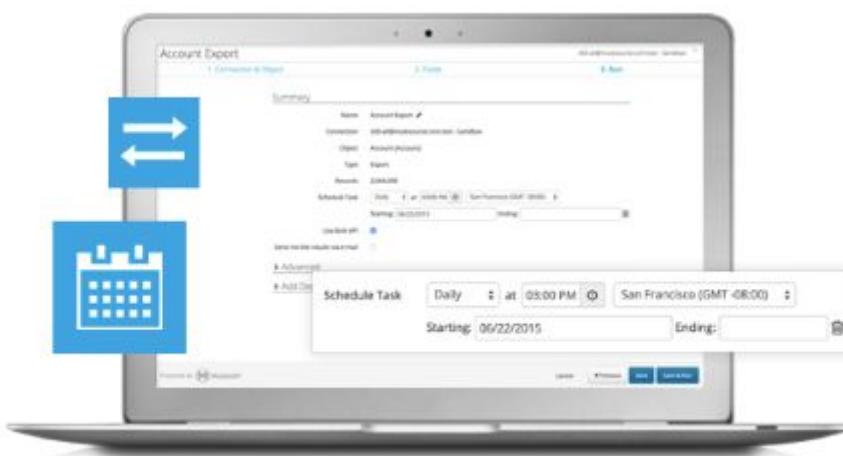

Connected

Import and export data directly from Box, Dropbox, FTP and SFTP repositories quickly and easily.

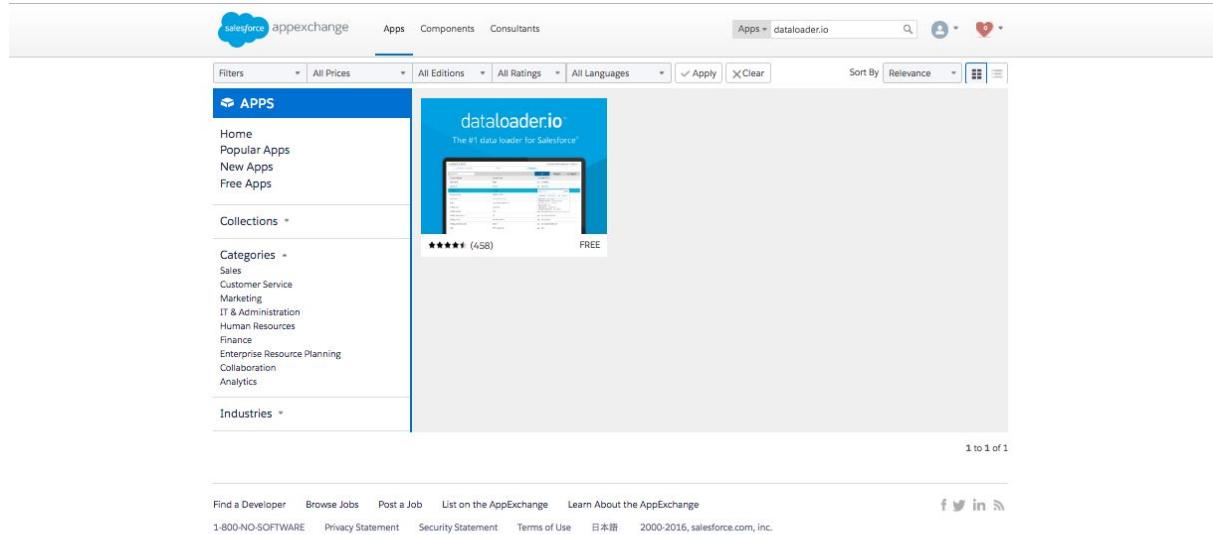

Schedule it and forget it

Schedule tasks to import and export data automatically on an hourly, daily, weekly or monthly basis.

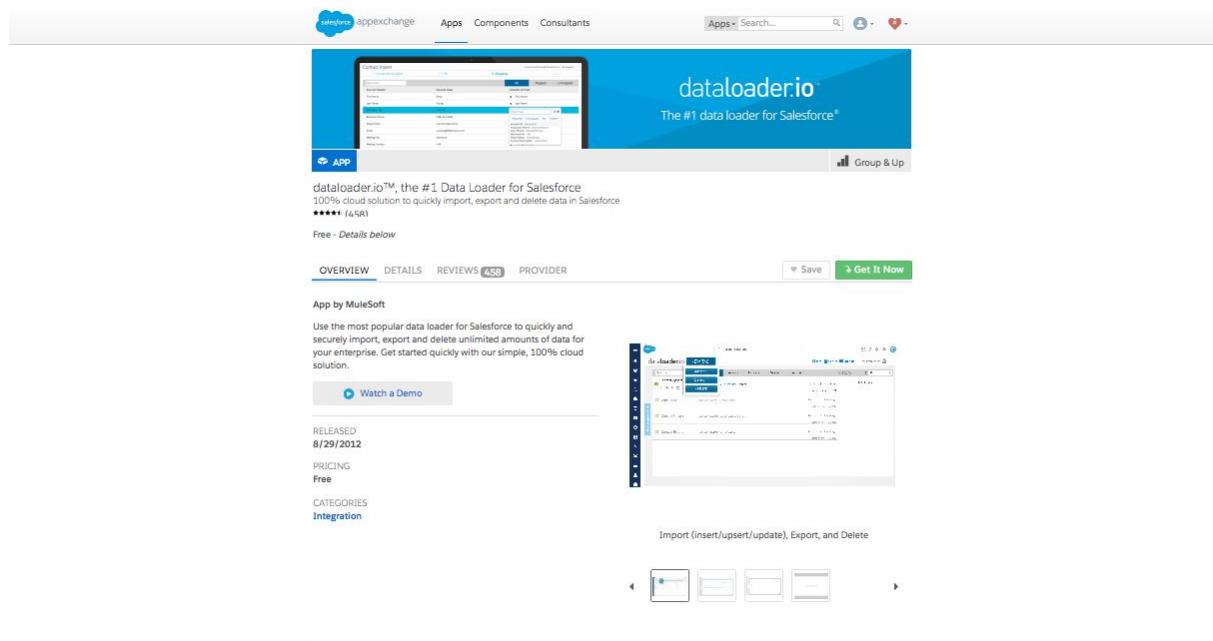

Downloading Dataloader.io

Downloaded dataloader.io from appexchange. It is free

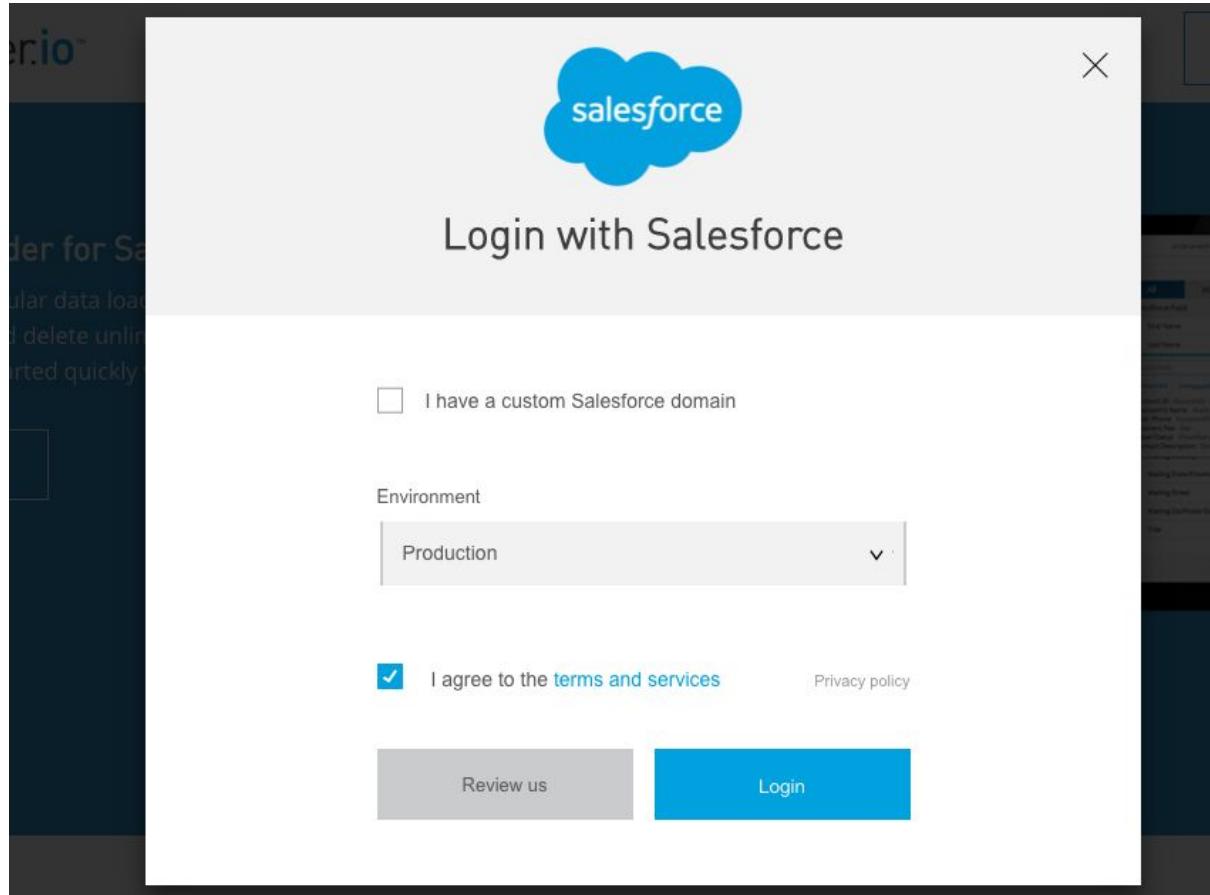

Click Get It Now

Checkbox Terms and conditions and click Install from Provider site

The screenshot shows the Salesforce AppExchange website. At the top, there's a navigation bar with the Salesforce logo, the word "appexchange", and links for "Apps", "Components", and "Consultants". A search bar and user profile icons are also present. Below the header, a large banner for "dataloader.io™" is displayed, featuring a screenshot of the app's interface showing a "Contact Insert" screen with fields like "First Name" and "Last Name". The banner text reads "The #1 data loader for Salesforce®". Below the banner, the app's details are shown: "dataloader.io™, the #1 Data Loader for Salesforce", "100% cloud solution to quickly import, export and delete data in Salesforce", a rating of "★★★★★ (458)", and a "Free - Details below" link. The "OVERVIEW" tab is selected. At the bottom of the page, there's an "Install from MuleSoft's Website" section with a checkbox for accepting terms and conditions, a "Cancel Install" link, and a prominent green "Install from provider's site" button.

After Install New page opens like this. Click Login(Bcz already login in Developer edition and appexchange).

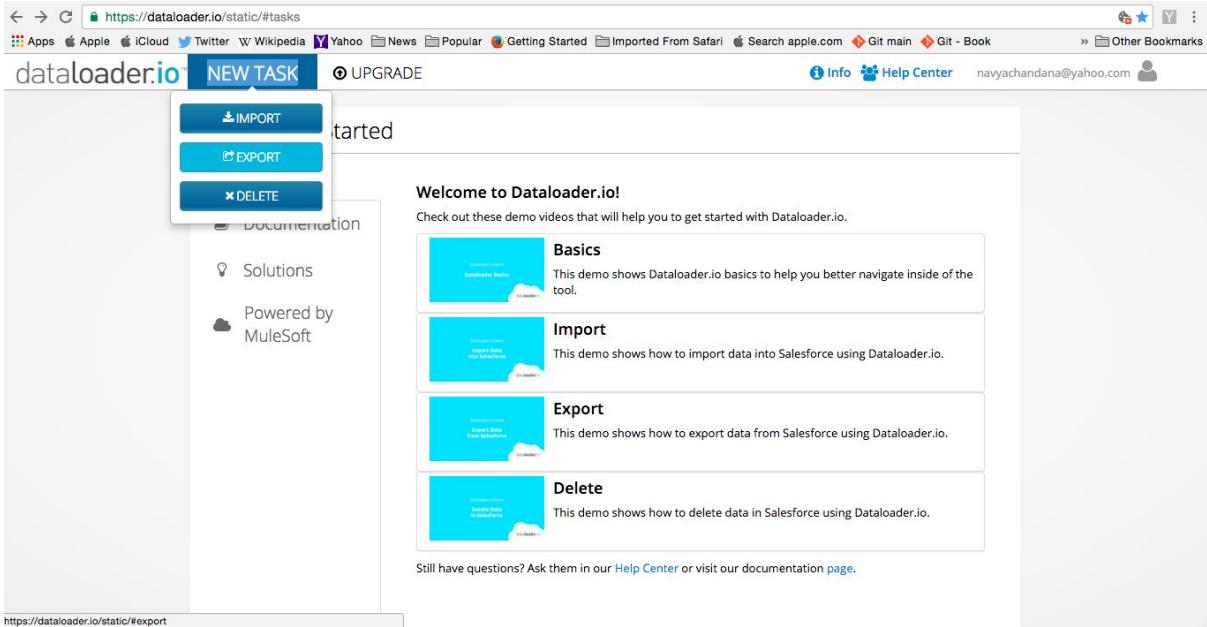

Export

Step 1 :After login we enter into this page. To create new tasks

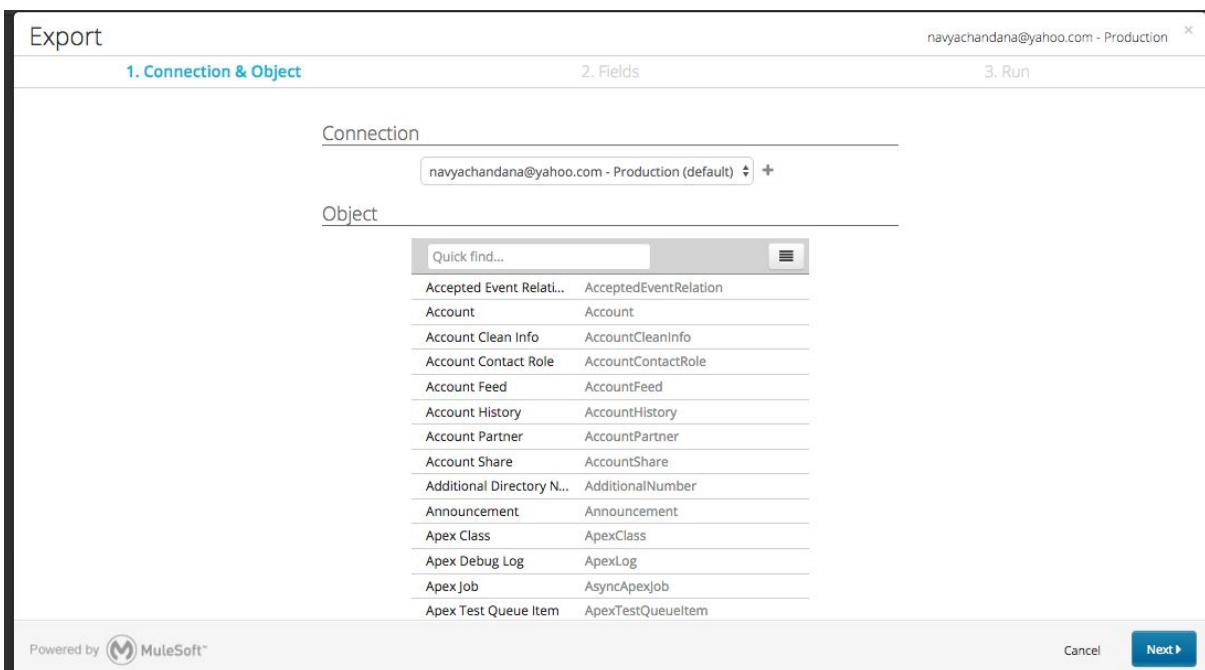

A screenshot of the Dataloader.io "Getting Started" page. The left sidebar includes links for "Welcome", "Documentation", "Solutions", and "Powered by MuleSoft". The main content area features a "Welcome to Dataloader.io!" section with a video thumbnail for "Basics". Below it are four cards: "Import", "Export", and "Delete", each with a video thumbnail and a brief description. At the bottom, there is a link to "Help Center" and "Documentation page".

Step 2 : Click New Task and click Export

The screenshot shows the Dataloader.io interface. At the top, there's a navigation bar with links like Apps, Apple, iCloud, Twitter, Wikipedia, Yahoo, News, Popular, Getting Started, Imported From Safari, Search apple.com, Git main, and Git - Book. Below the navigation bar, the URL https://dataloader.io/static/#tasks is visible. The main header says "dataloader.io NEW TASK" and "UPGRADE". On the left, there's a sidebar with "IMPORT", "EXPORT" (which is highlighted in blue), "DELETE", and "Documentation". Below the sidebar, there are links for "Solutions" and "Powered by MuleSoft". The main content area has a heading "Welcome to Dataloader.io!" followed by a section titled "Basics" with a sub-section "Import". Other sections include "Export" and "Delete". At the bottom, there's a link to the "Help Center" and a note about documentation.

Step 3 : Select environment to connect

The screenshot shows the "Export" configuration screen. The title is "Export" and it's associated with "navyachandana@yahoo.com - Production". There are three tabs at the top: "1. Connection & Object" (which is active), "2. Fields", and "3. Run". The "Connection" section shows "navyachandana@yahoo.com - Production (default)". The "Object" section has a "Quick find..." input field and a list of objects: Accepted Event Relation, Account, Account Clean Info, Account Contact Role, Account Feed, Account History, Account Partner, Account Share, Additional Directory N..., Announcement, Apex Class, Apex Debug Log, Apex Job, Apex Test Queue Item, Account, AccountCleanInfo, AccountContactRole, AccountFeed, AccountHistory, AccountPartner, AccountShare, AdditionalNumber, Announcement, ApexClass, ApexLog, AsyncApexJob, ApexTestQueueItem, AcceptedEventRelation, Account, AccountCleanInfo, AccountContactRole, AccountFeed, AccountHistory, AccountPartner, AccountShare, AdditionalNumber, Announcement, ApexClass, ApexLog, AsyncApexJob, ApexTestQueueItem. At the bottom, it says "Powered by MuleSoft" and has "Cancel" and "Next" buttons.

Step 4 : Select the Object

Step 7 : Task is Running

dataloader.io NEW TASK ⚙ UPGRADE

Info Help Center navyachandana@yahoo.com

Quick find... All Imports Exports Deletes Scheduled History All

Book Export Task Run 7337292: Queued... last run: 2 minutes ago created on October 19th, 2016 No History

Step 8 : Task is done

dataloader.io NEW TASK ⚙ UPGRADE

Info Help Center navyachandana@yahoo.com

Quick find... All Imports Exports Deletes Scheduled History All

Book Export Task Run 7337410: 34 successes last run: 5 minutes ago created on October 19th, 2016 No History

Step 9 : Click on the task. The export file is download

The screenshot shows the Salesforce Data Loader interface at <https://data.loader.io/static/#tasks/3445813>. The page displays two completed 'Book Export' tasks. Task Run 7337410 has 34 successes, last run 7 minutes ago, and was created on October 19th, 2016. Task Run 7337292 also has 34 successes, last run 16 minutes ago, and was created on October 19th, 2016. The interface includes tabs for All, Imports, Exports, Deletes, and Scheduled, and a History section.

Step 10 : We can see it below. File is downloaded.

The screenshot shows the same Salesforce Data Loader interface as above. A context menu is open over the first 'Book Export' task, with the 'Open' option highlighted. Other options in the menu include 'Always Open Files of This Type' and 'Show in Finder'. The task details remain the same as in the previous screenshot.

Step 11 : Open the file. This is our export file.

Import(Insert)

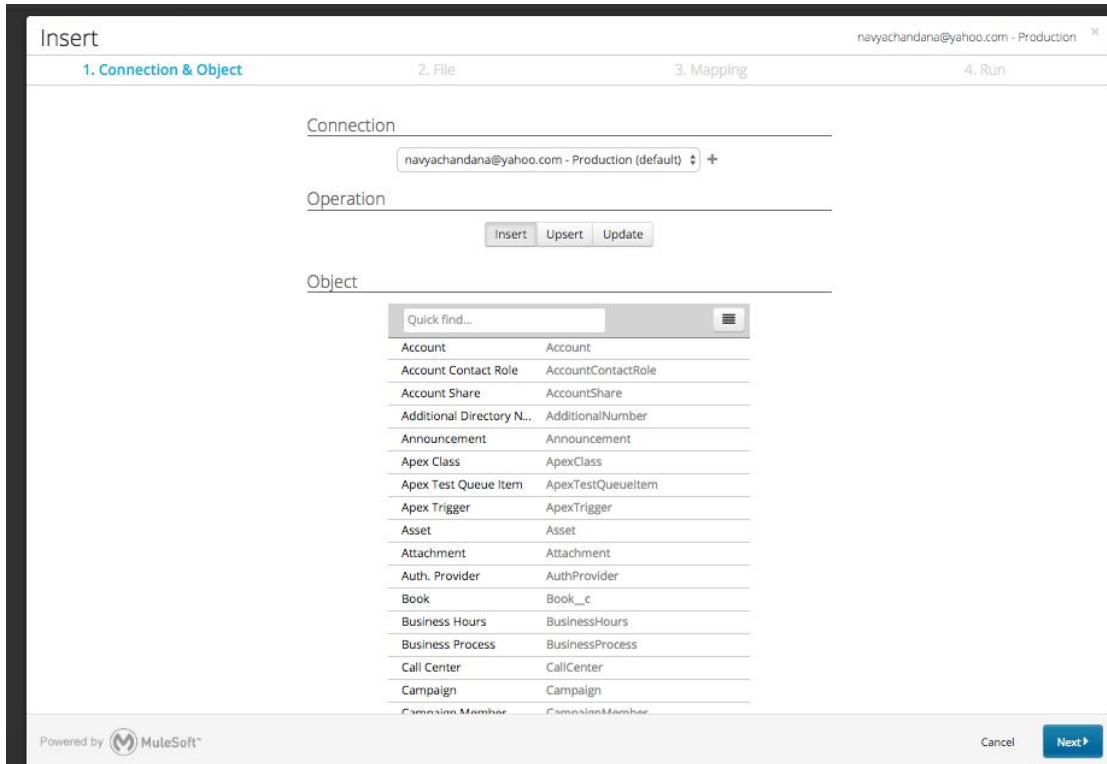

Step 1 : Click New Task and Click Import

The screenshot shows the Salesforce DataLoader interface. At the top, there's a navigation bar with links like Apps, Apple, iCloud, Twitter, Wikipedia, Yahoo, News, Popular, Getting Started, Imported From Safari, Search apple.com, Git main, and Git - Book. Below the navigation bar, the main area has a title 'NEW TASK' and tabs for IMPORT, EXPORT, and DELETE. Under the IMPORT tab, it says 'UPGRADE'. There are two task entries listed:

- Task Run 7327410: 34 successes. Last run: 18 minutes ago, created on October 19th, 2016.
- Task Run 7337292: 34 successes. Last run: 28 minutes ago, created on October 19th, 2016.

On the left side, there's a sidebar titled 'Book Export' with a 'Quick find...' input field and a 'DELETE' button. The bottom of the page has a footer with links to https://dataloader.io/static/#import and terms of use/privacy policy.

Step 7 : The task is running

A screenshot of the Salesforce Data Loader interface showing a task named "Book Insert". The status bar at the top of the page indicates "Task Run 7337694: Checking file format...". The task details show it was last run 2 minutes ago and created on October 19th, 2016. The interface includes tabs for All, Imports, Exports, Deletes, and Scheduled, and a History section.

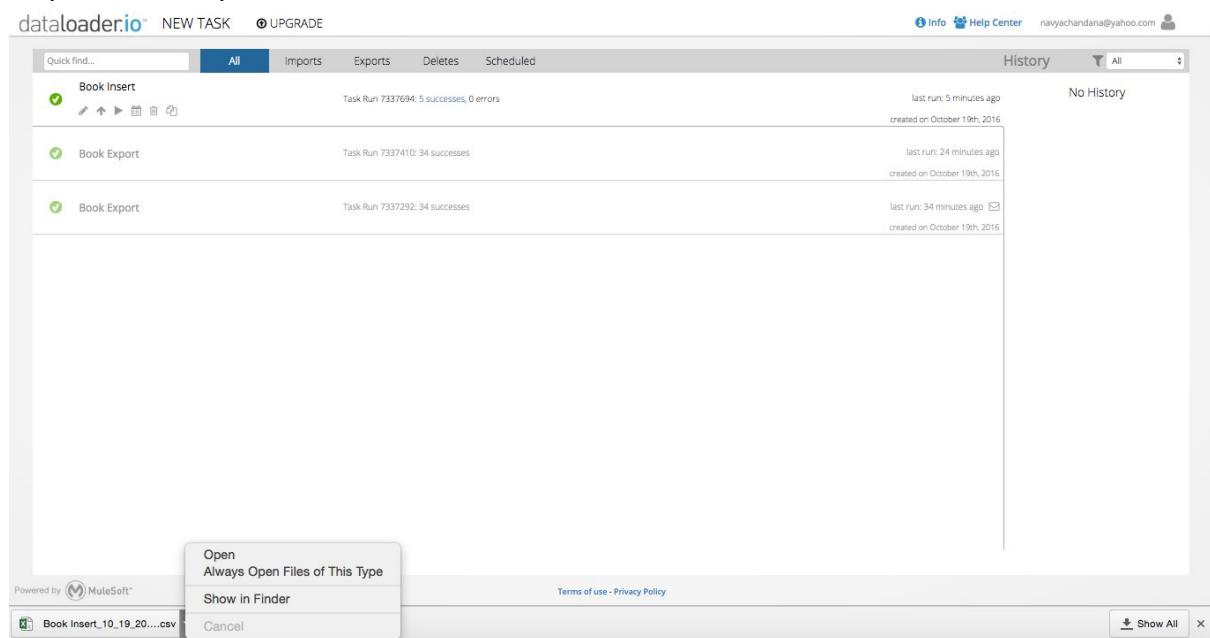

Step 8 : Task is completed

A screenshot of the Salesforce Data Loader interface showing the same task "Book Insert" now completed. The status bar at the top of the page indicates "Task Run 7337694: 5 successes, 0 errors". The task details show it was last run 5 minutes ago and created on October 19th, 2016. The interface includes tabs for All, Imports, Exports, Deletes, and Scheduled, and a History section.

Step 9 : Click on the task the success file is downloaded.

Step 10 : Click open

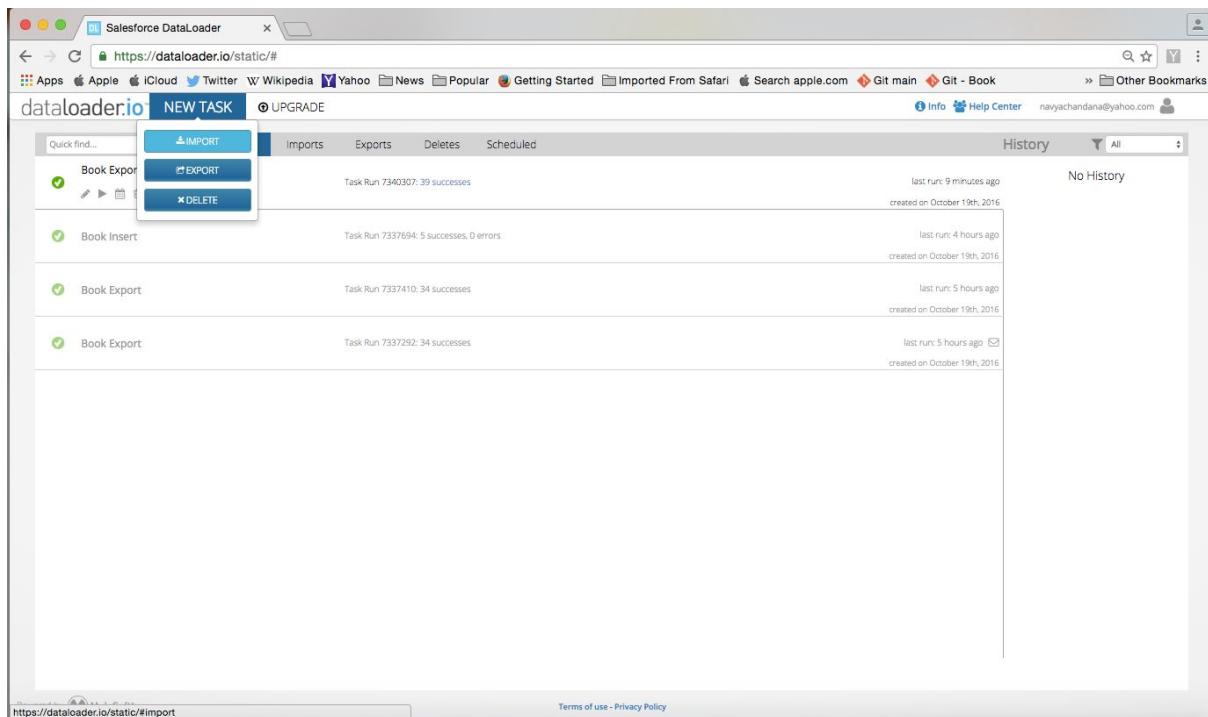

Step 11 : This is the success file which shows items are created successfully.

The screenshot shows a Microsoft Excel spreadsheet with the following data:

	STATUS	COMMENTS	ID	Name	Price_c

Import(Update)

Step 1 : Click New Task & Click Import

Step 2 : Select Update

A screenshot of the 'Update' step in the Data Loader wizard. The top navigation bar shows tabs: '1. Connection & Object' (active), '2. File', '3. Mapping', and '4. Run'. The 'Connection' section shows a single connection named 'navyachandana@yahoo.com - Production (default)'. The 'Operation' section has three buttons: 'Insert', 'Upsert' (selected), and 'Update'. The 'Object' section contains a list of Salesforce objects: Account, Account Clean Info, Account Contact Role, Account Share, Additional Directory N..., Announcement, Apex Class, Apex Test Queue Item, Apex Trigger, AppMenuItem, Approval Request, Asset, Attachment, Auth. Provider, Book, Business Hours, Business Process, Case, Contact, Custom Object, Custom Setting, Custom Validation Rule, Database, Document, Event, File, Group, Group Membership, Lead, Location, Note, Opportunity, Order, Page Layout, Record Type, Report, Report Type, Schedule, Search, Section, Service Contract, Task, User, UserRole, and Workitem. At the bottom, there are 'Cancel' and 'Next' buttons. A note at the bottom left says 'Powered by MuleSoft'.

Step 3 : Select Object

File is selected. Click Open

Step 5 : Mapping is done automatically

The screenshot shows the Salesforce DataLoader interface for a 'Book Update' task. The 'Mapping' step is active. The mapping table shows:

Source Header	Sample Data	Salesforce Field
Id	a0N36000006o63lEAA	All → Record ID Lookup via: [Use ID as key for update]
Name	Go Programming Language update	→ Book Name
Price__c	23	→ Price

At the bottom, there are 'Cancel', 'Previous', 'Next', and 'Save' buttons.

Click Next

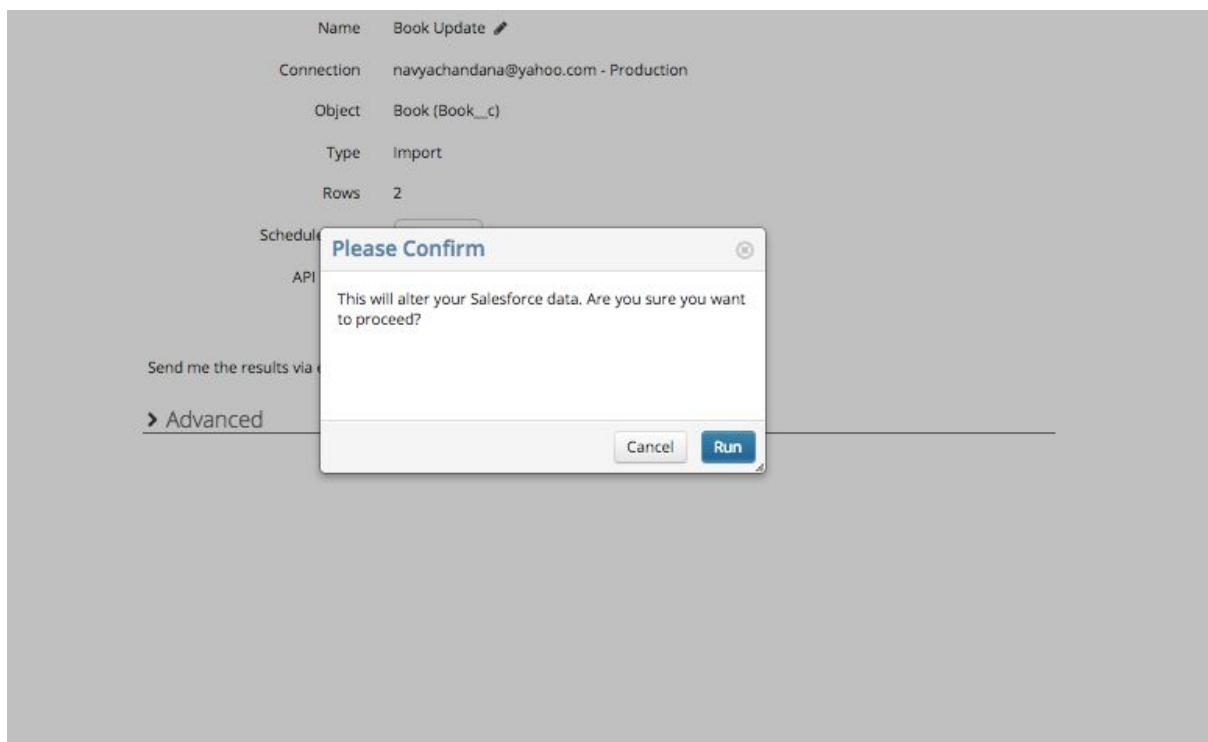

Step 6 : Run the task. Select Bulk API

The screenshot shows the 'Run' step configuration. The 'Summary' section is selected, displaying:

Name	Book Update
Connection	navyachandana@yahoo.com - Production
Object	Book (Book__c)
Type	Import
Rows	2
Schedule Task	None
API Mode	<input checked="" type="radio"/> Use Bulk API <input type="radio"/> Use Batch API with 200 records per request.

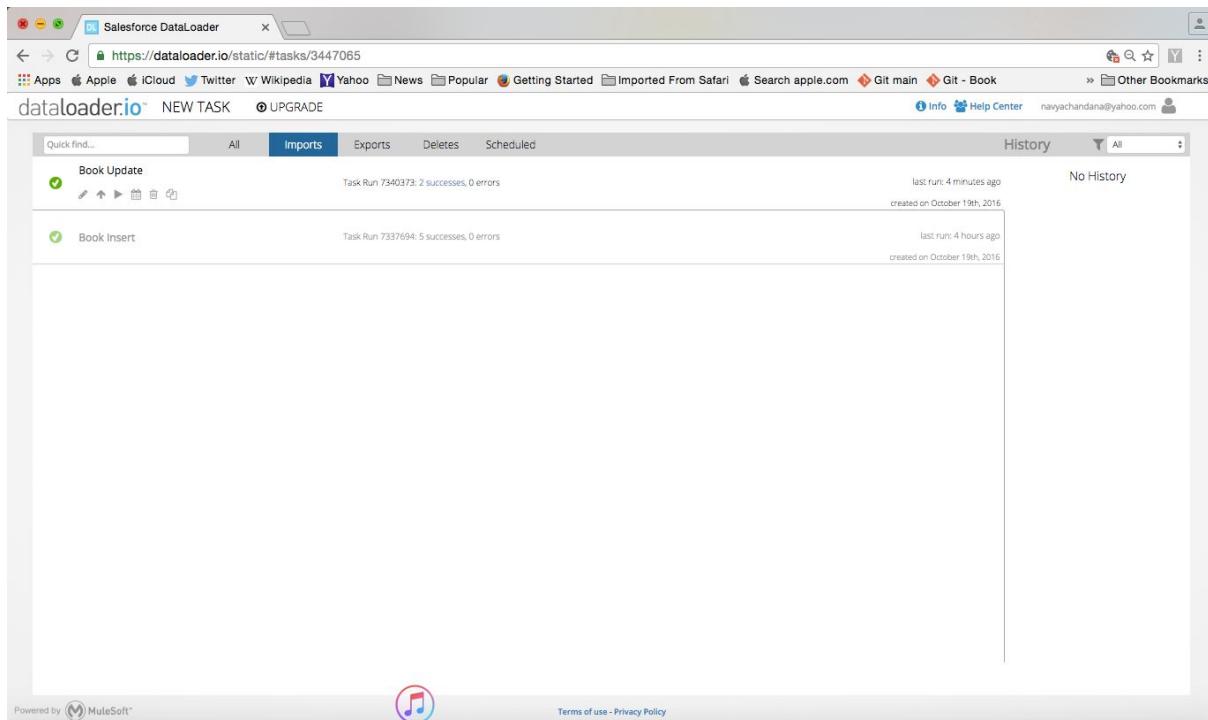

Below the summary, there's an 'Advanced' section and a 'Send me the results via e-mail' checkbox. At the bottom, there are 'Cancel', 'Previous', 'Save', and 'Save & Run' buttons.

Warning appears like this

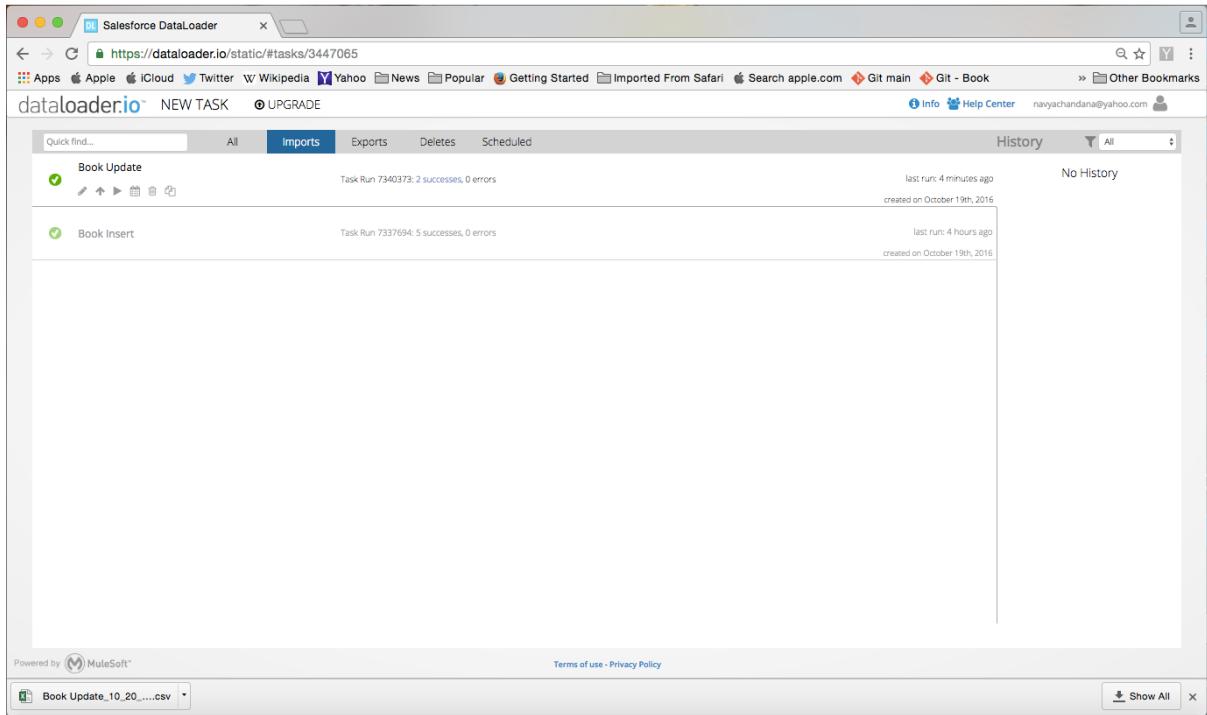

Click Run

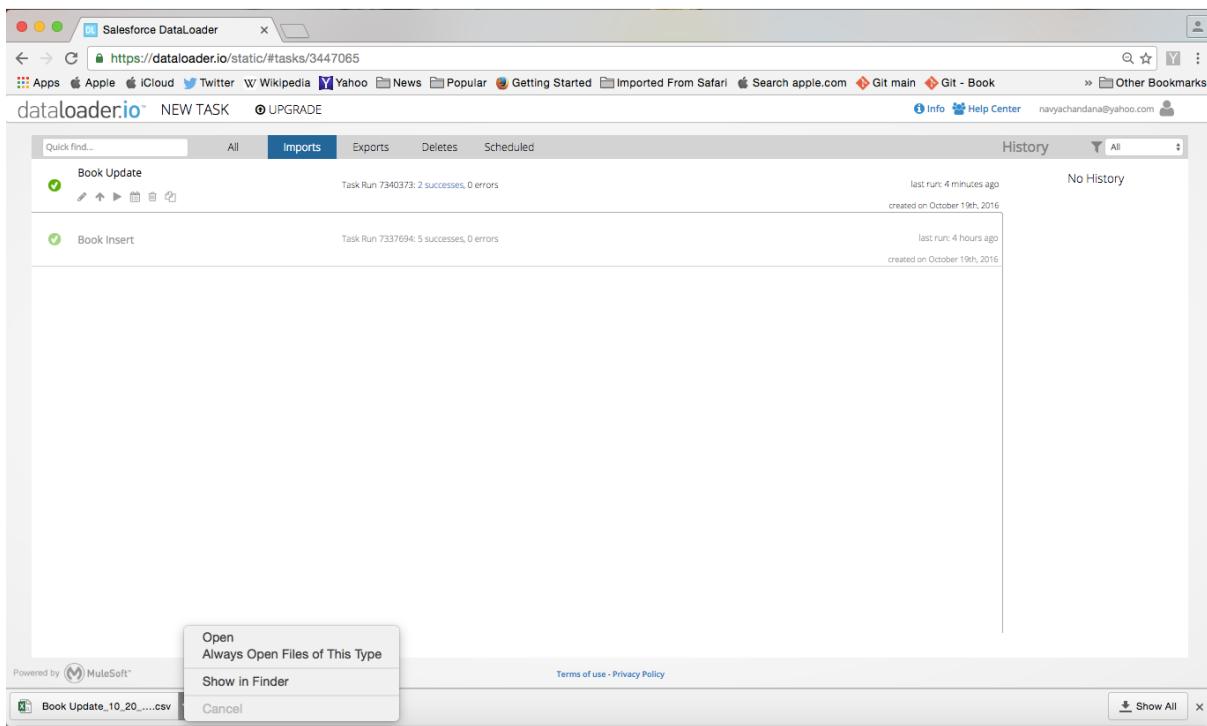

Step 7 : Task is completed

Step 8 : Click on the Import task. The update success file is downloaded.

Step 9 : Open it.

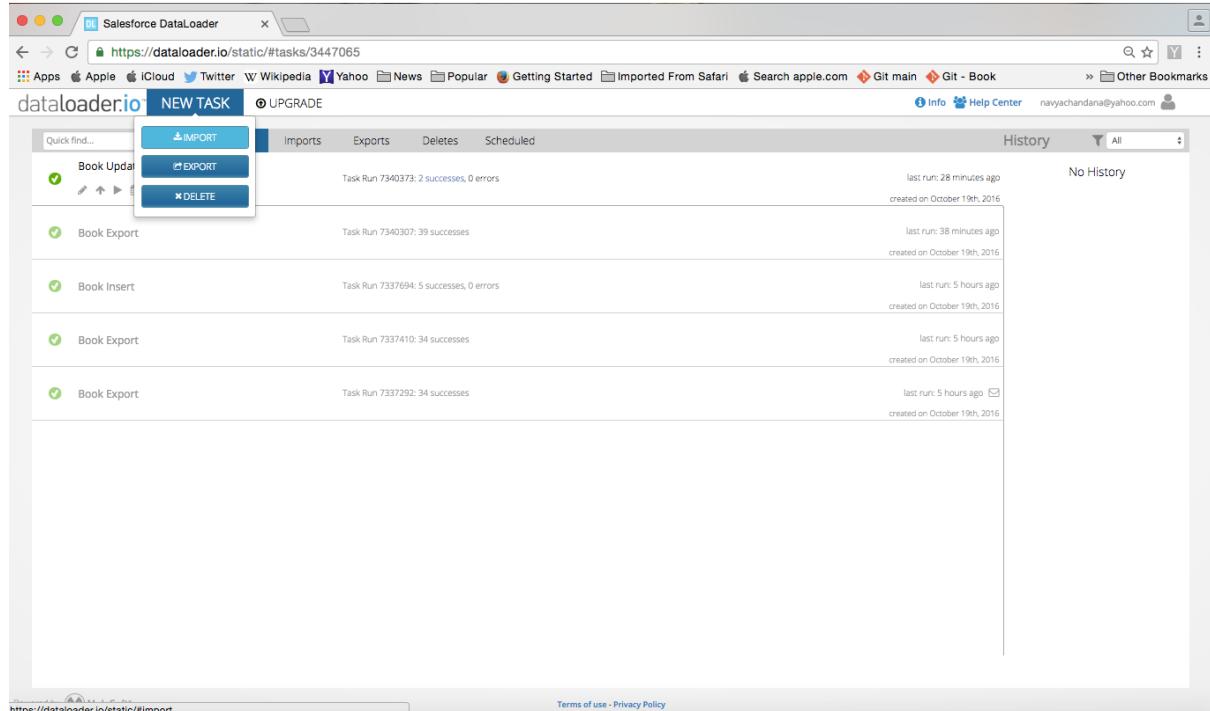

Step 10 : This is update success file which shows items are updated successfully

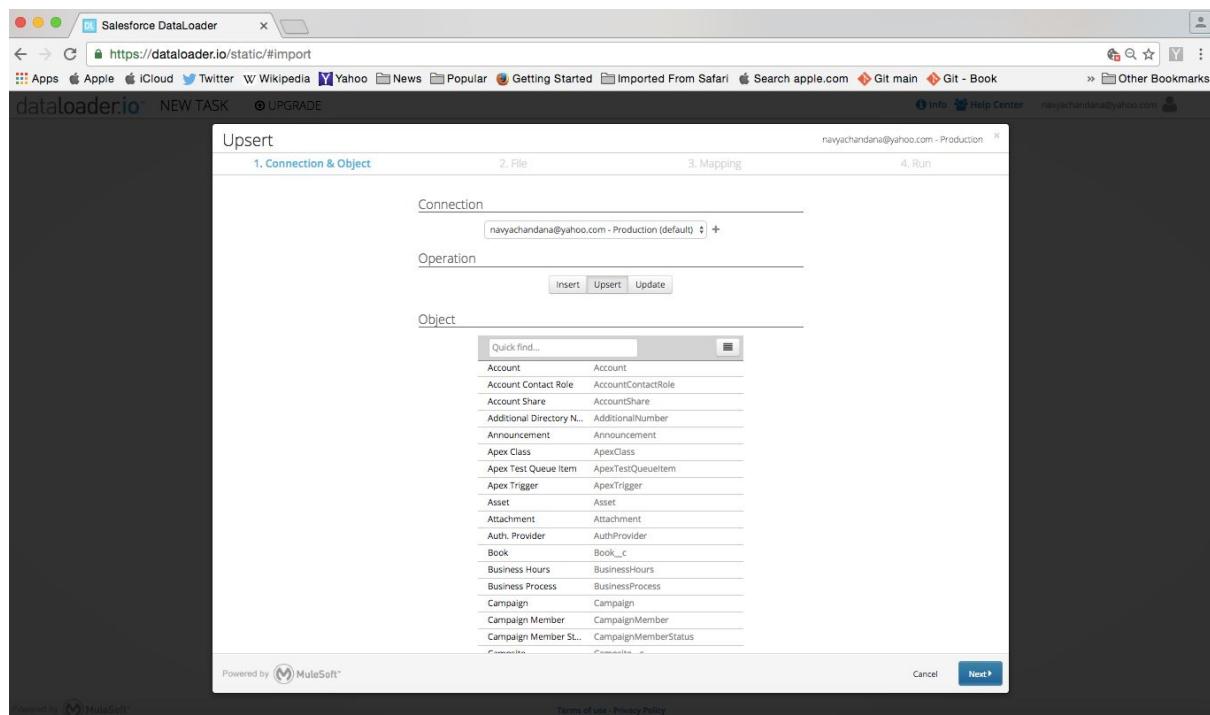

STATUS	COMMENTS	Id	Name	Price__c
ITEM update	aON36000006o63lEAA	Go Programming Language update	23	
ITEM update	aON36000006o63gEAA	Scala High Performance Programming update	10	

Import(Upsert)

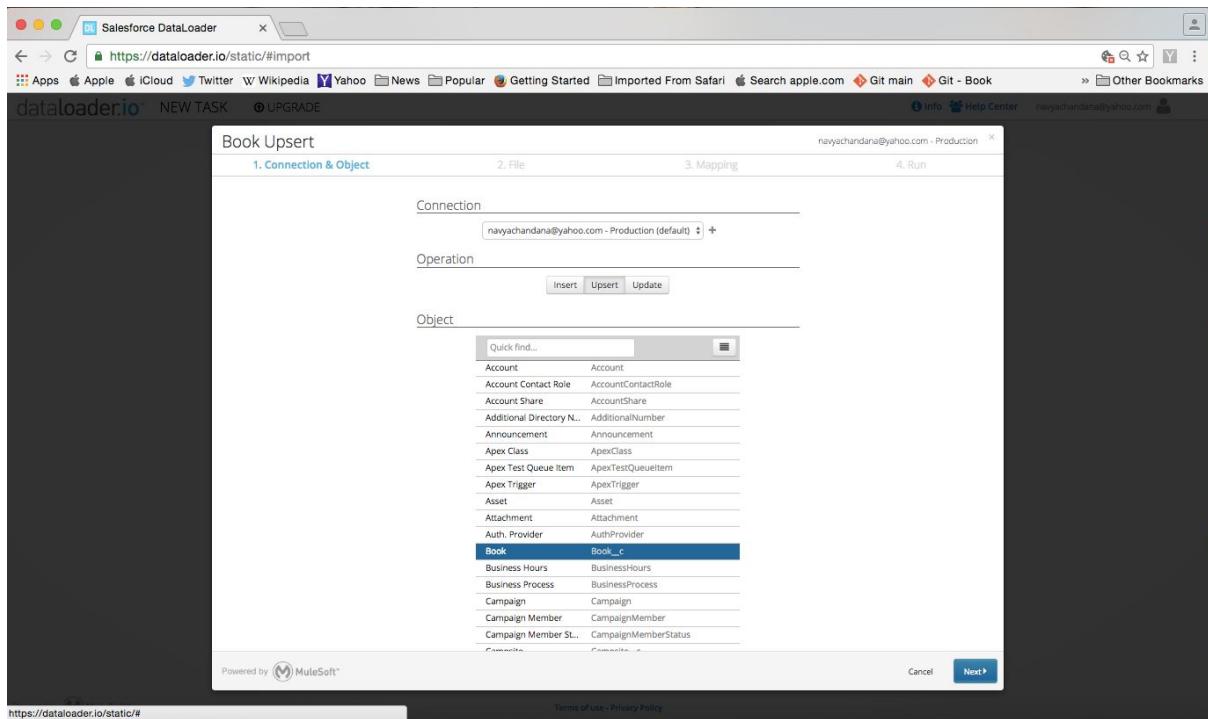

Step 1 : Click New Task & Click Import

Step 2 : Select Upsert

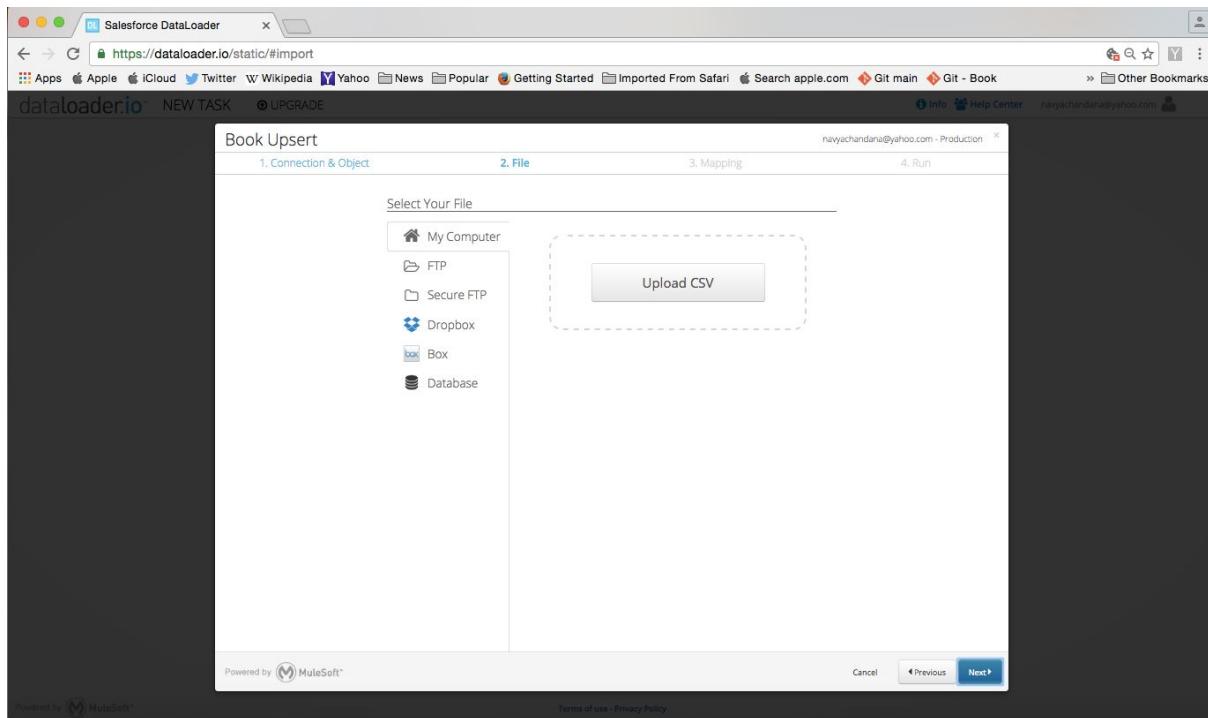

Step 3 : Select Object

Click Next

Step 4 : Click Upload CSV

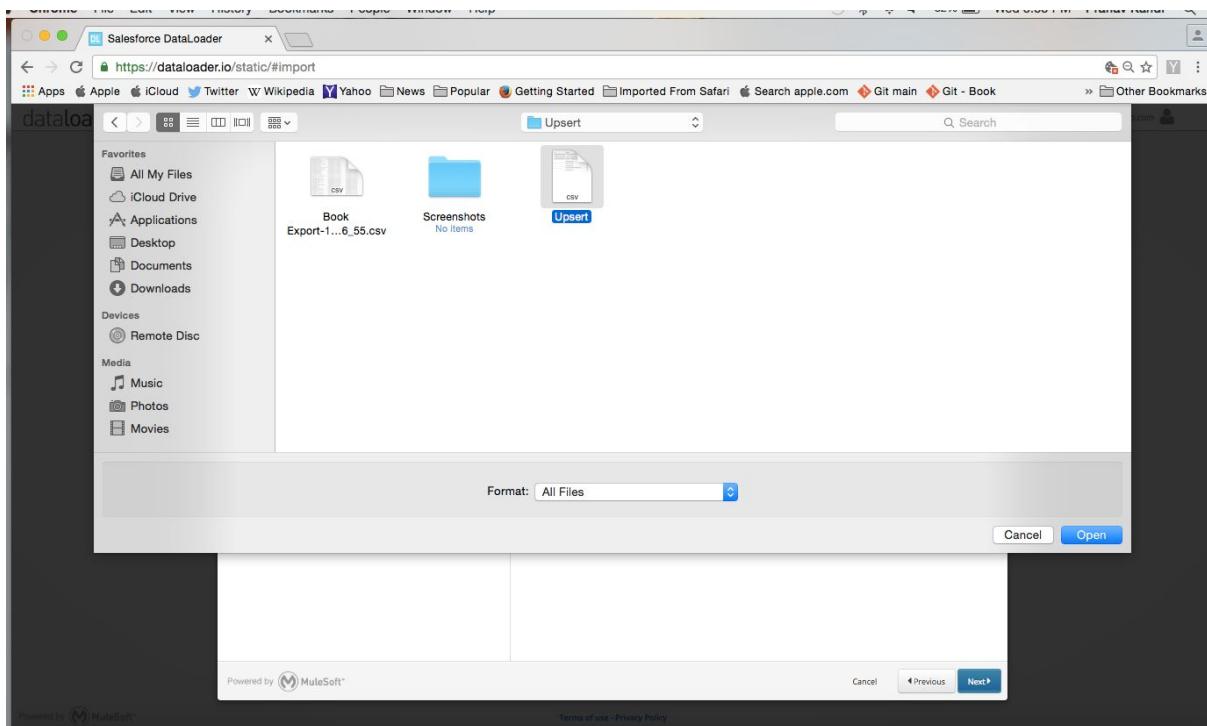

This is export.csv file

Updated export.csv file and saved upsert.csv file. In this file we had updated few existing records and created new records for upsert purpose.

Selected the csv file

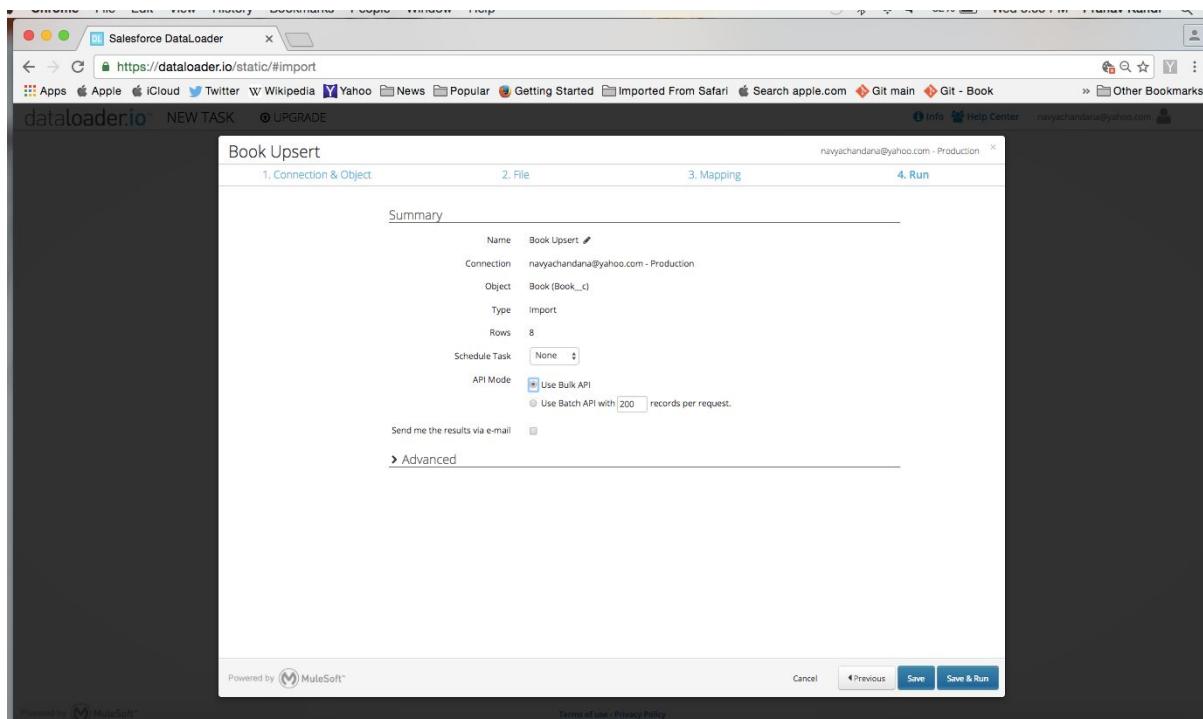

Click open

Step 5 : Mapping is done automatically

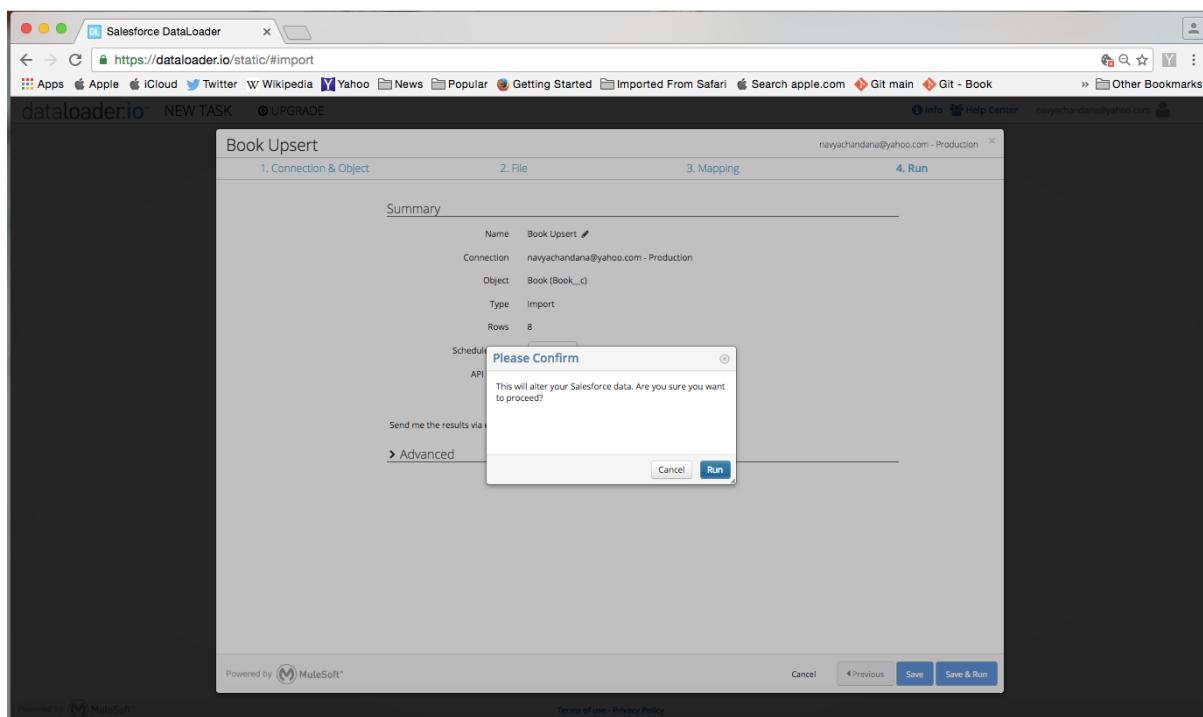

Click Next

Step 6 : Run the Task. Select Bulk API

Click Save & Run

Warning appears

Click Run

Step 7 : Task is running

The screenshot shows the Salesforce DataLoader interface. At the top, there's a navigation bar with links like Apps, Apple, iCloud, Twitter, Wikipedia, Yahoo, News, Popular, Getting Started, Imported From Safari, Search apple.com, Git main, Git - Book, and Other Bookmarks. Below the bar, the URL https://dataloader.io/static/#tasks is visible. The main area is titled "dataloader.io NEW TASK ⚙ UPGRADE". It features a "History" tab selected, showing a list of tasks:

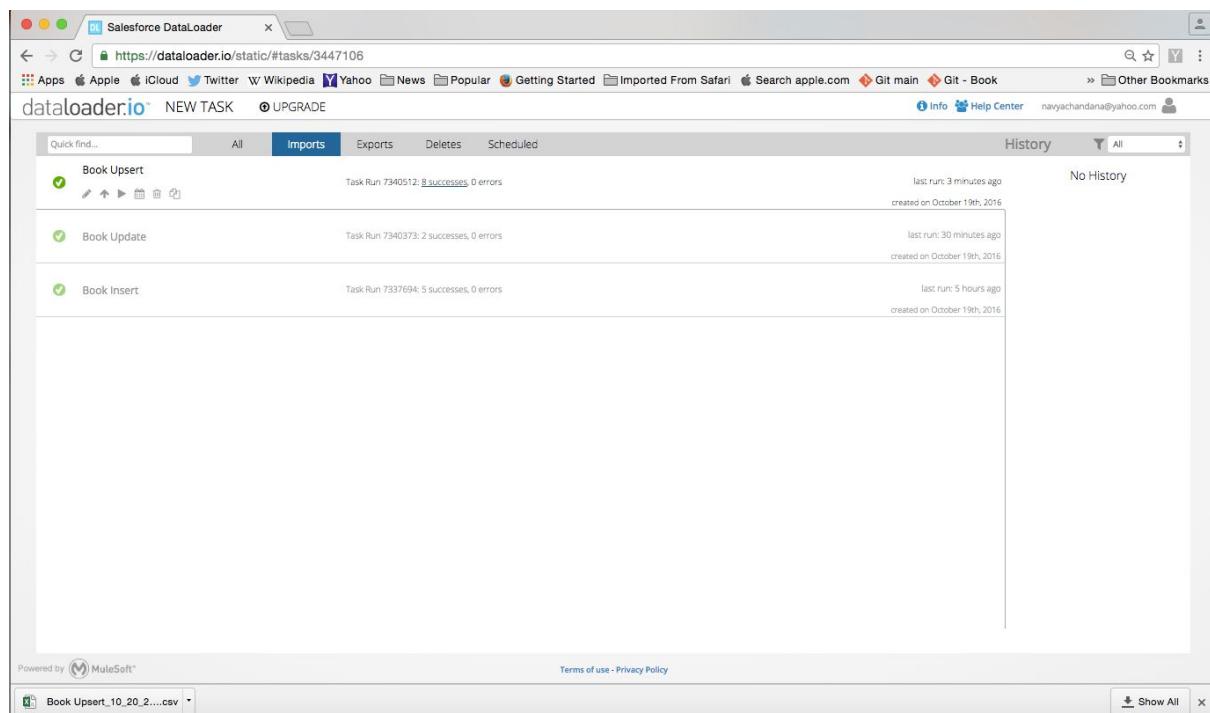

Task Type	Description	Last Run	Created On
Book Upsert	Task Run 7340512: Queued...	last run: 2 minutes ago	created on October 19th, 2016
Book Update	Task Run 7340373: 2 successes, 0 errors	last run: 29 minutes ago	created on October 19th, 2016
Book Insert	Task Run 7337694: 5 successes, 0 errors	last run: 5 hours ago	created on October 19th, 2016

At the bottom left, it says "Powered by MuleSoft".

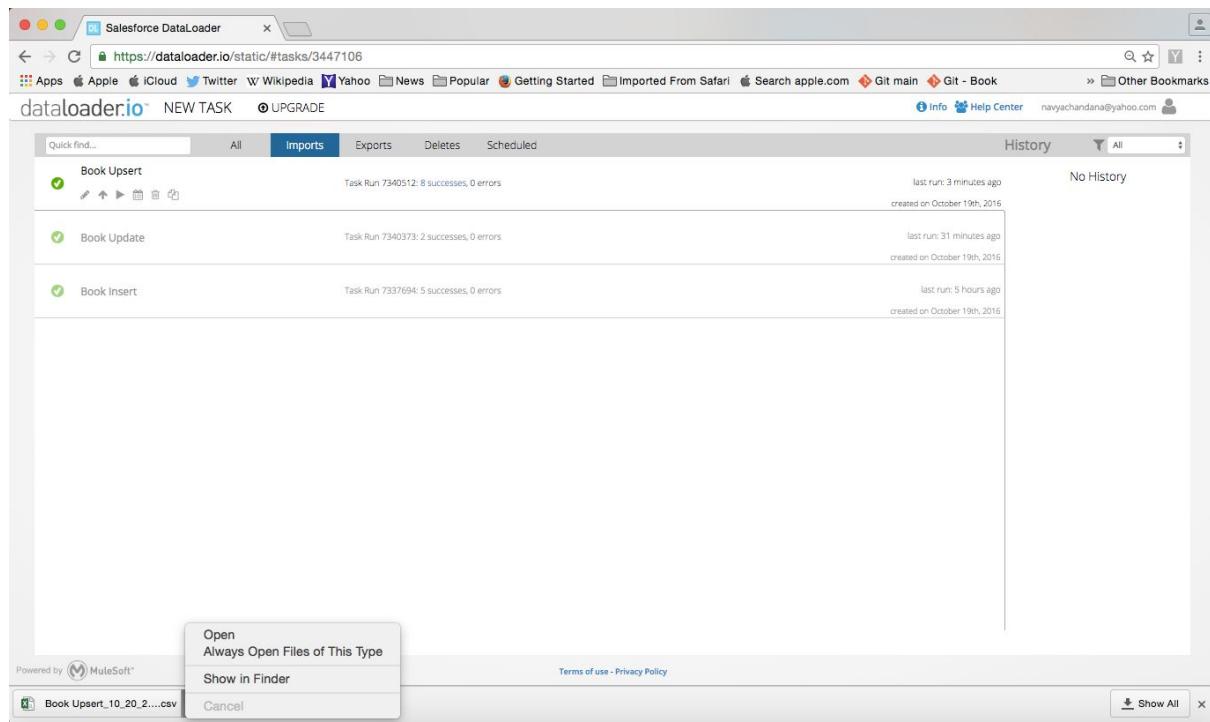

Step 8 : Task is completed

This screenshot is identical to the one above, showing the same task history and interface. The "Imports" tab is now selected instead of "History". The tasks listed are the same: Book Upsert, Book Update, and Book Insert, all with their respective run details.

Step 9 : Click in the Task. The success file is downloaded.

Step 10 : Open the success file

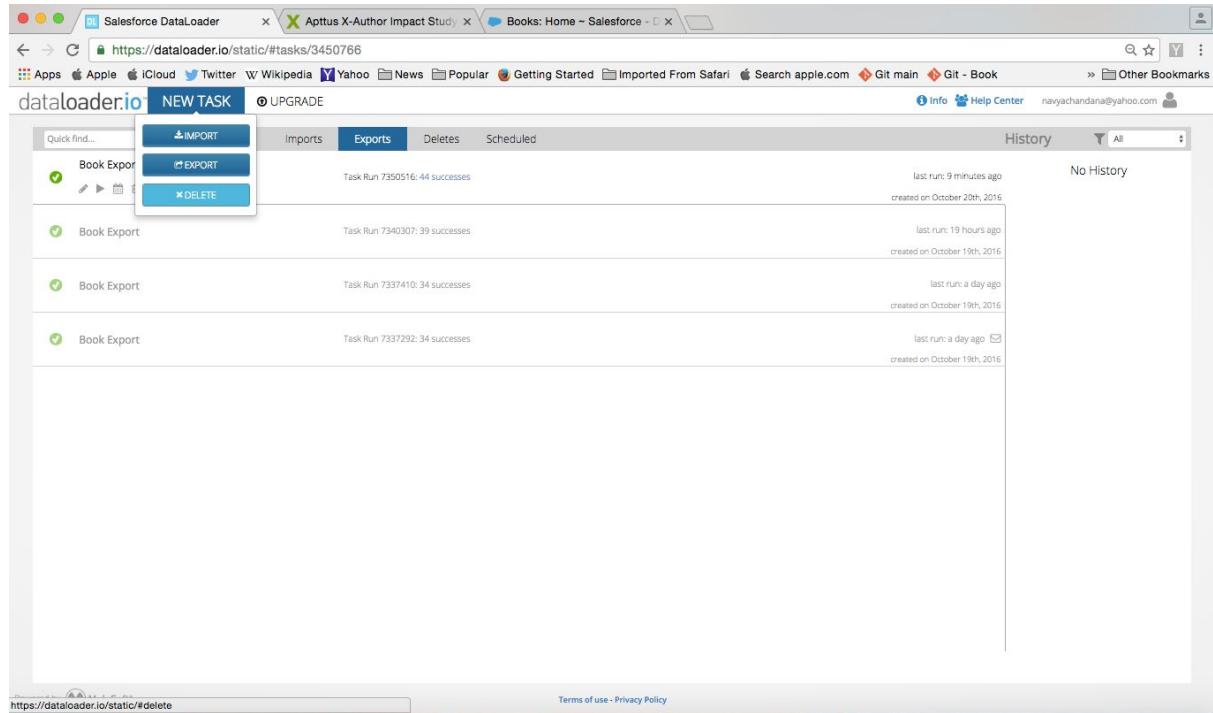

Step 11 : This is upsert success file which shows how items are performed upsert(update and created)

Book Upsert_10_20_2016-00_54_30_success.csv

STATUS	COMMENTS	ID	Id	Name	Price_c
ITEM upsert (update)		aON36000006063hEAA	aON36000006063hEAA	R Programming upsert	15

Delete

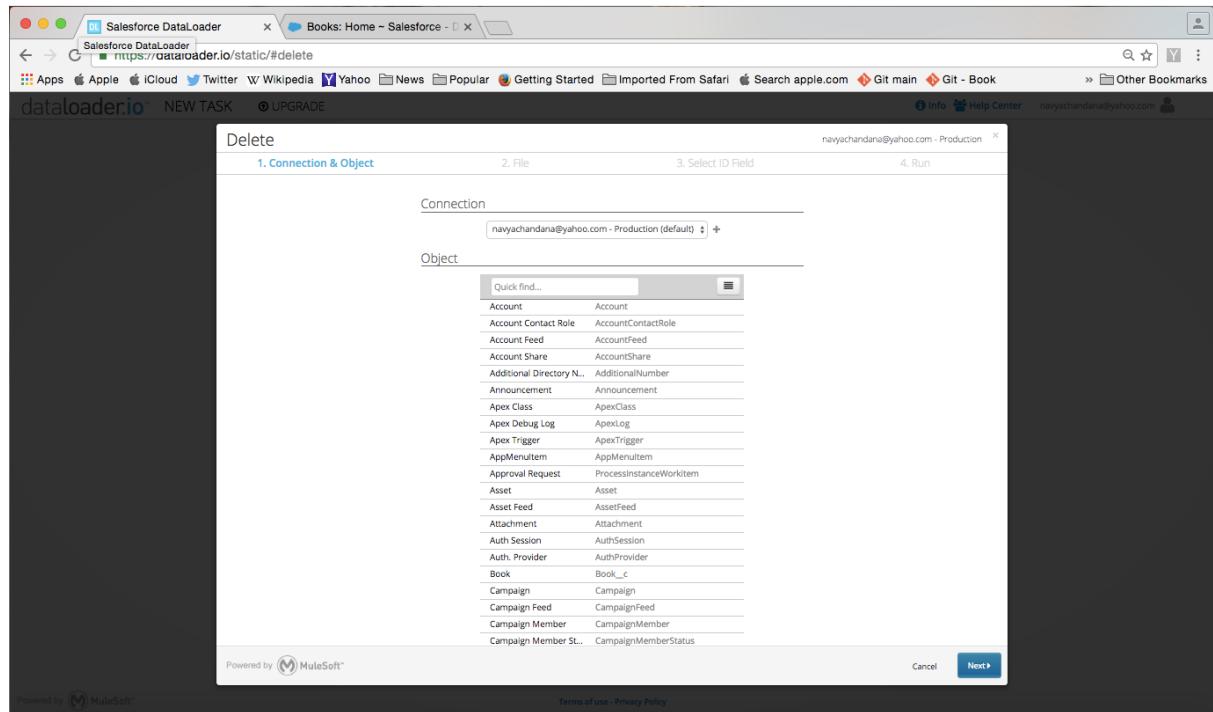

Step 1 : Select New Task & Click Delete

The screenshot shows the DataLoader interface with the 'Exports' tab selected. On the left, there's a sidebar with buttons for 'IMPORT', 'EXPORT', and 'DELETE'. Below the sidebar, a list of tasks is displayed:

- Task Run 7350516: 44 successes (last run: 9 minutes ago, created on October 20th, 2016)
- Task Run 7340307: 39 successes (last run: 19 hours ago, created on October 19th, 2016)
- Task Run 7337410: 34 successes (last run: a day ago, created on October 19th, 2016)
- Task Run 7337292: 34 successes (last run: a day ago, created on October 19th, 2016)

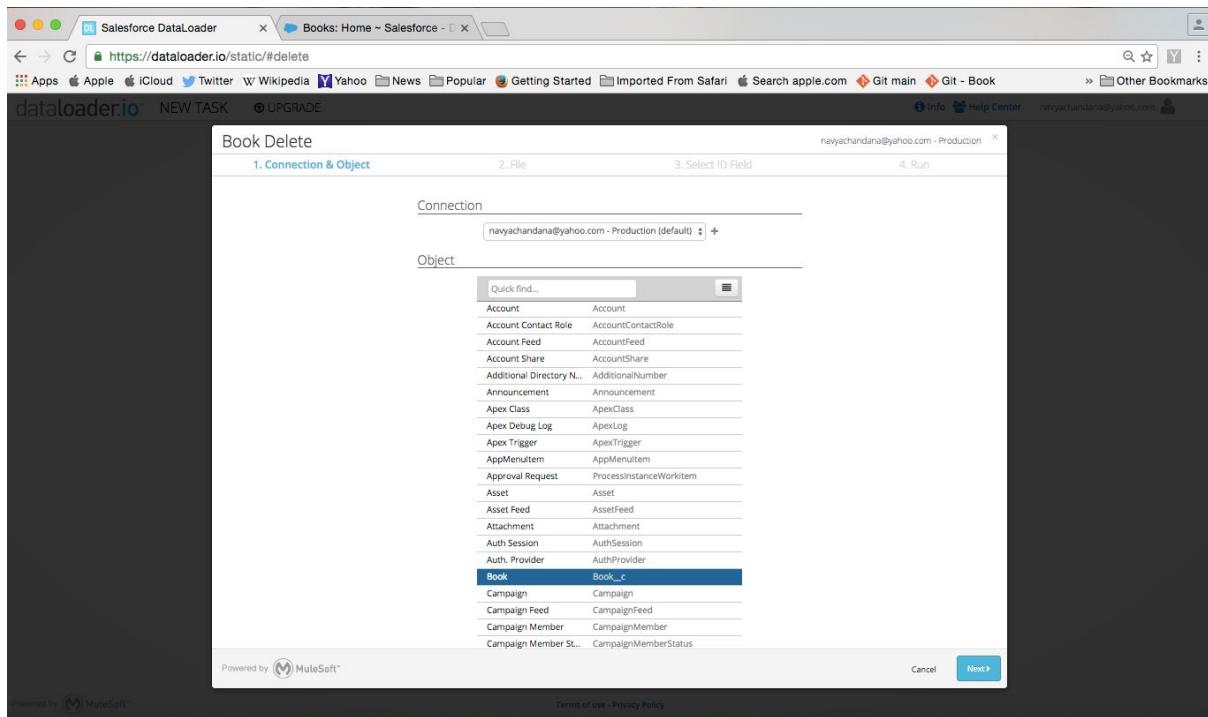

Step 2 : Selecting environment

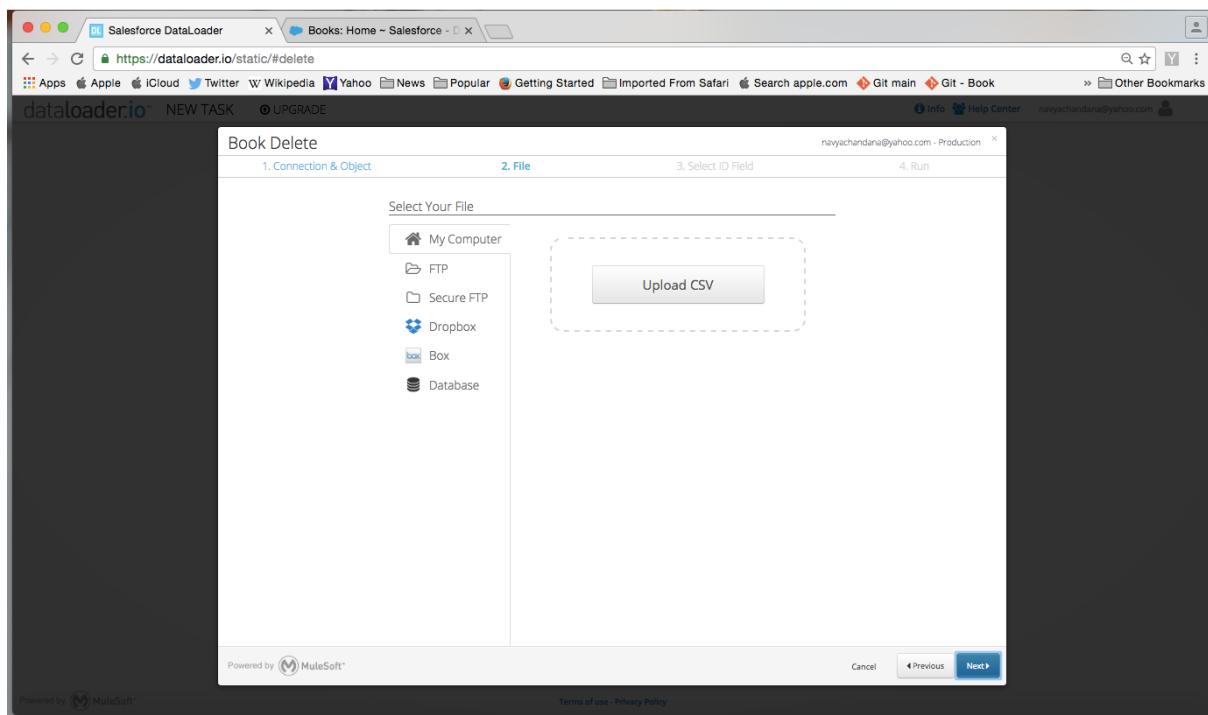

The screenshot shows the 'Delete' wizard, step 1: Connection & Object. The connection is set to 'navyachandana@yahoo.com - Production (default)'. The object list includes:

- Account
- Account Contact Role
- Account Feed
- Account Share
- Additional Directory N...
- Announcement
- Apex Class
- Apex Debug Log
- Apex Trigger
- AppMenuItem
- Approval Request
- Asset
- Asset Feed
- Attachment
- Auth Session
- Auth. Provider
- Book
- Campaign
- Campaign Feed
- Campaign Member
- Campaign Member St...

Step 3 :Select object .

Step 4 : Click Upload CSV file

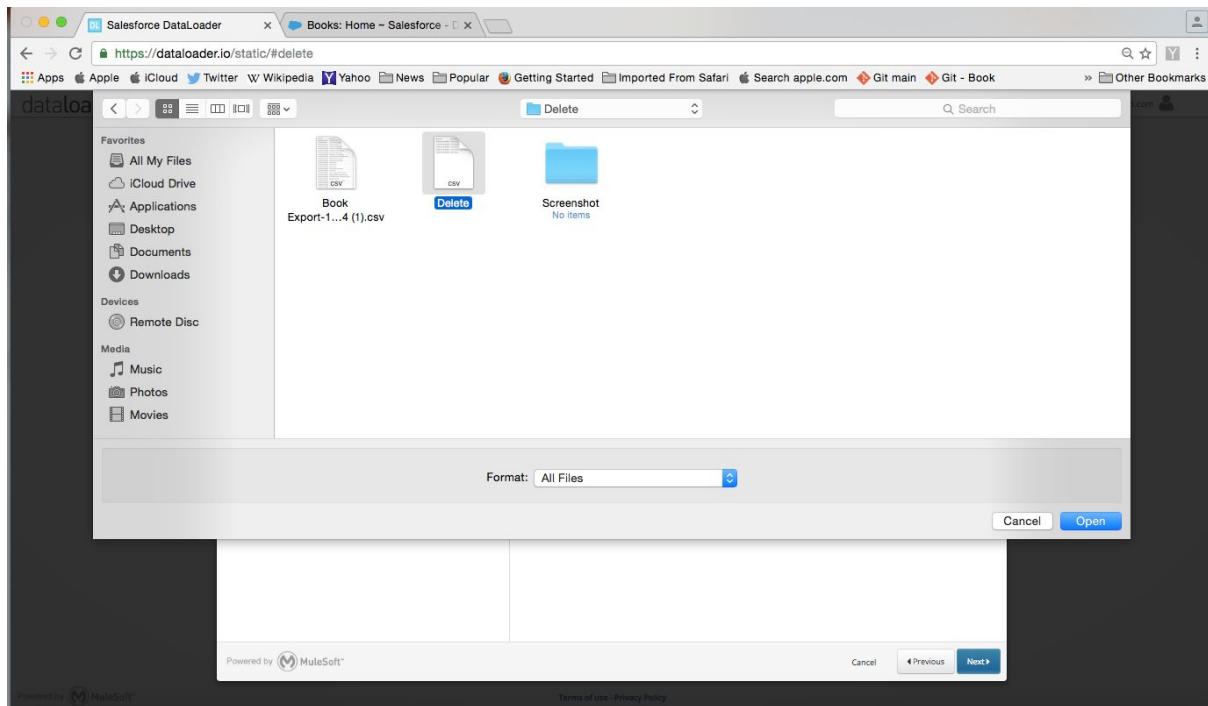

This is export file

Updated the export.csv file and saved as delete.csv.

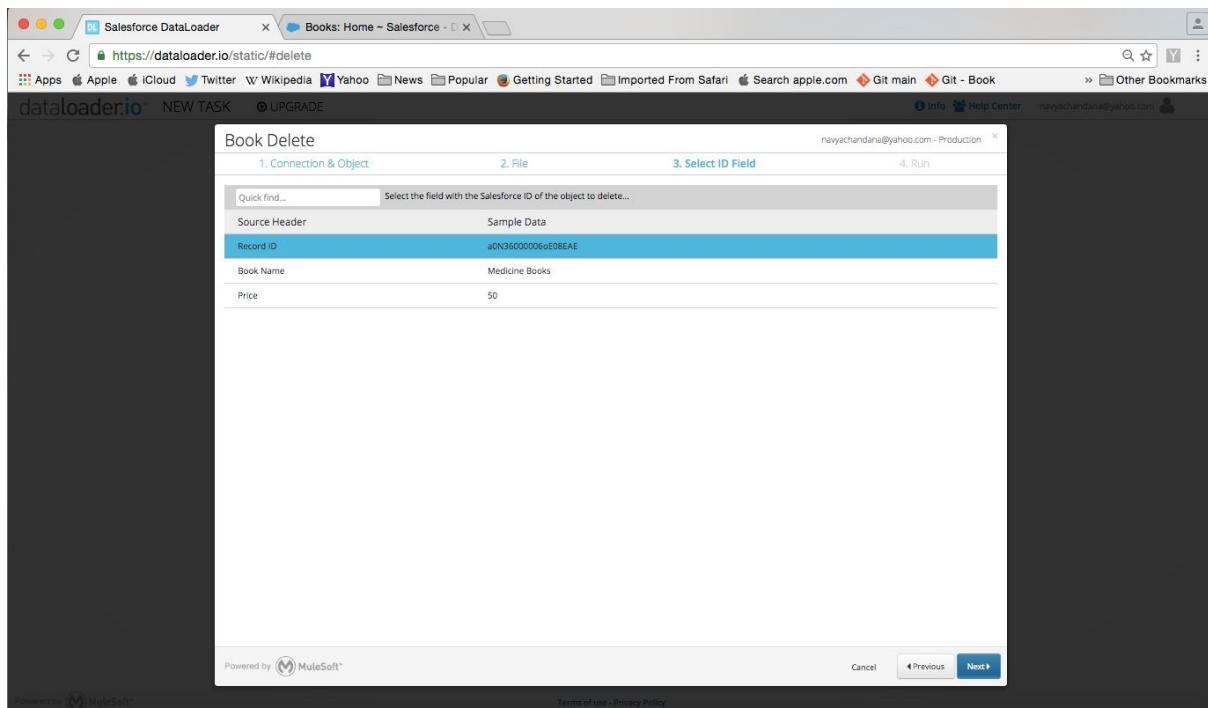

Record ID	Book Name	Price
2	Medicine Books	50
3	Fairy tail stories	24
4	Business Law	231
5	Human Anatomy & Physiology	36
6	Micro Biology	40

CSV file is selected

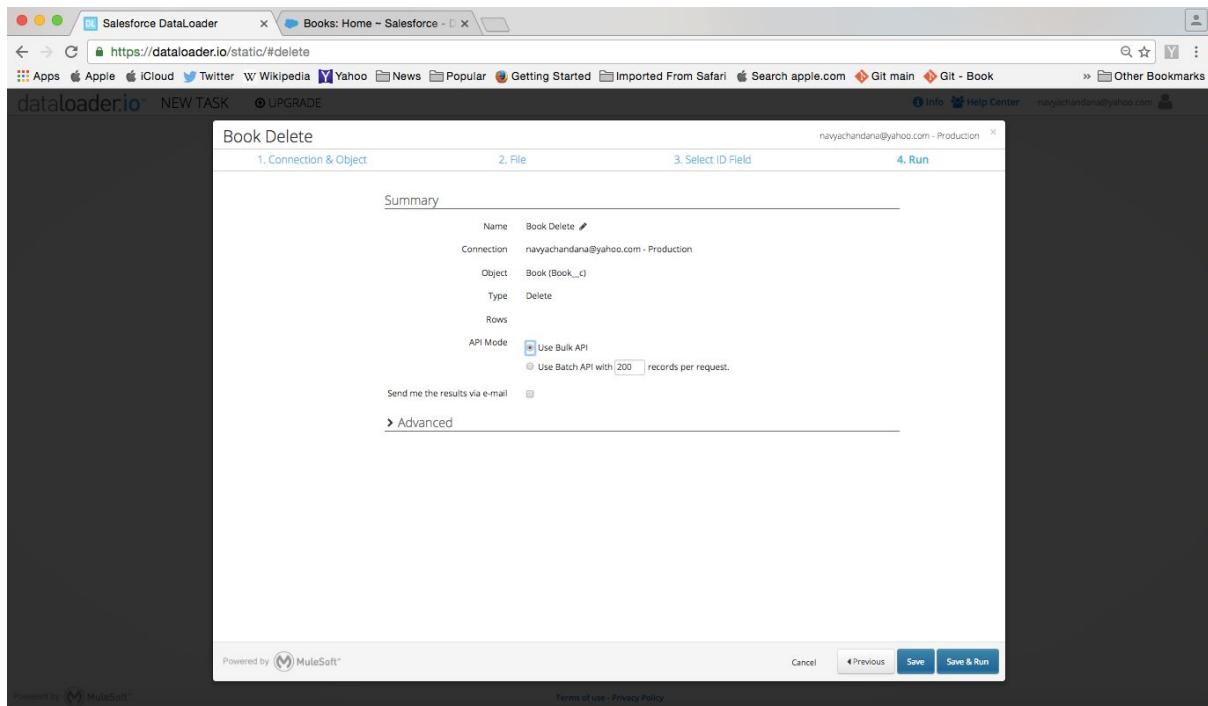

Click Open

Step 5 : Mapping is done automatically

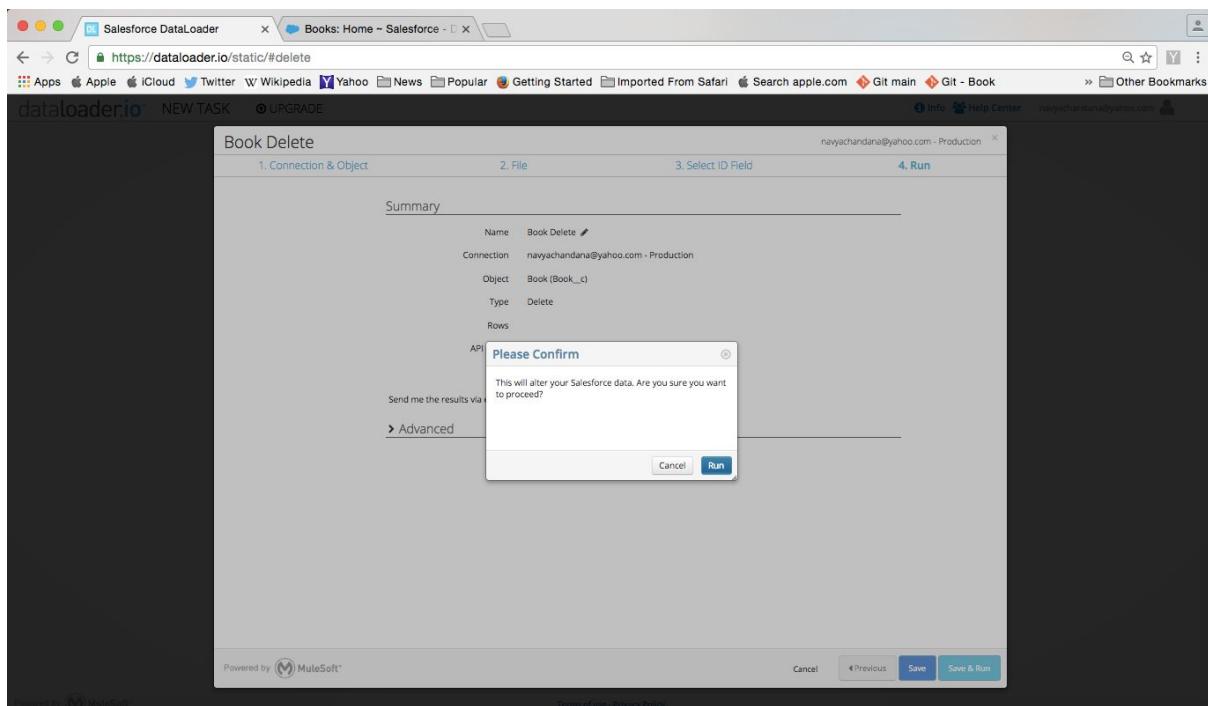

Click Next

Step 6 : Run the Task. Select Bulk API

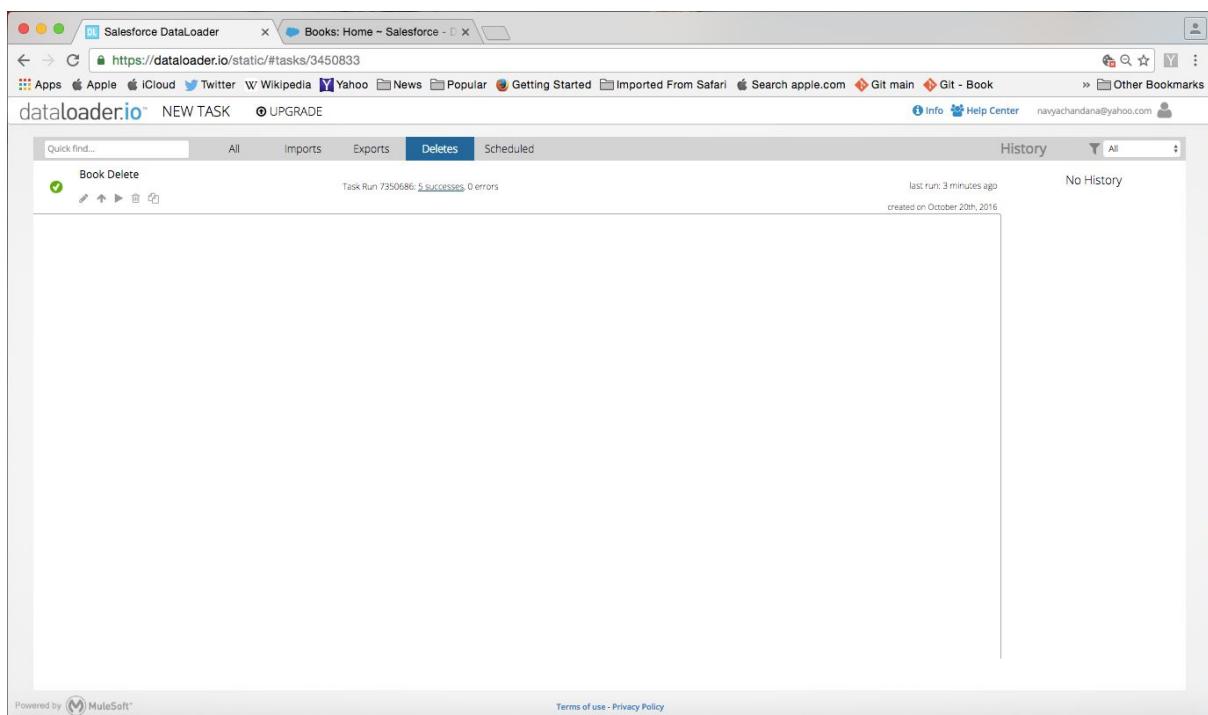

Warning appears

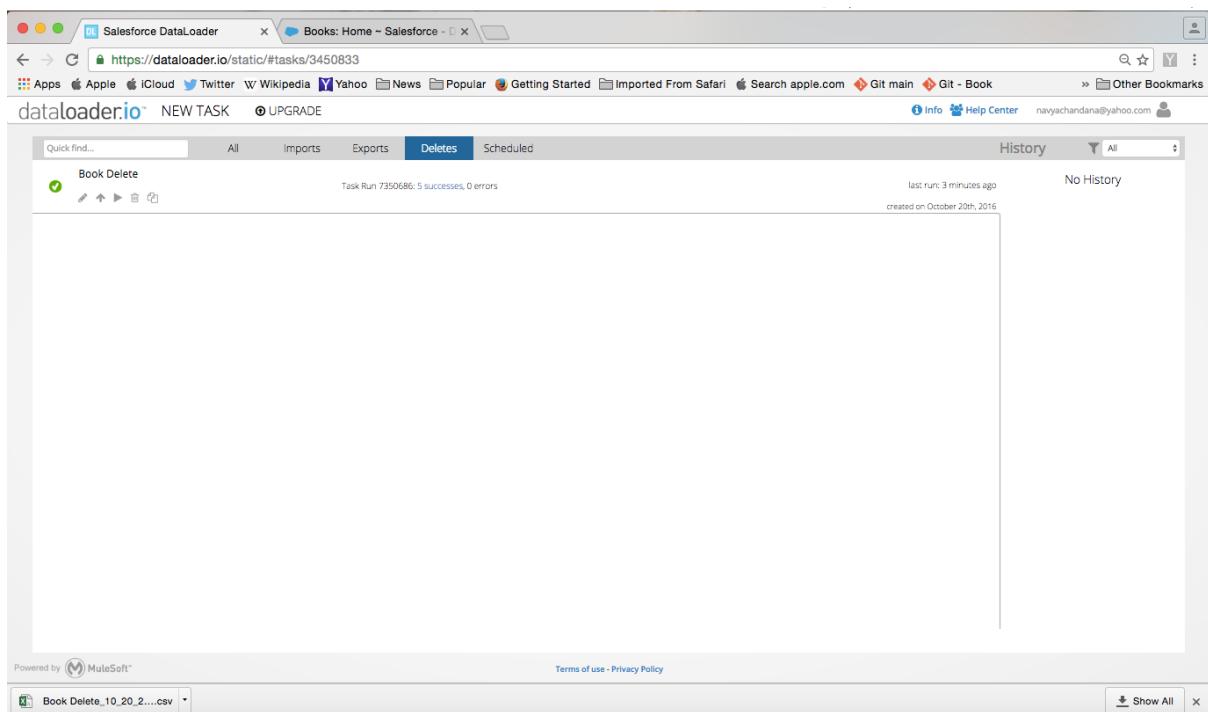

Click Run

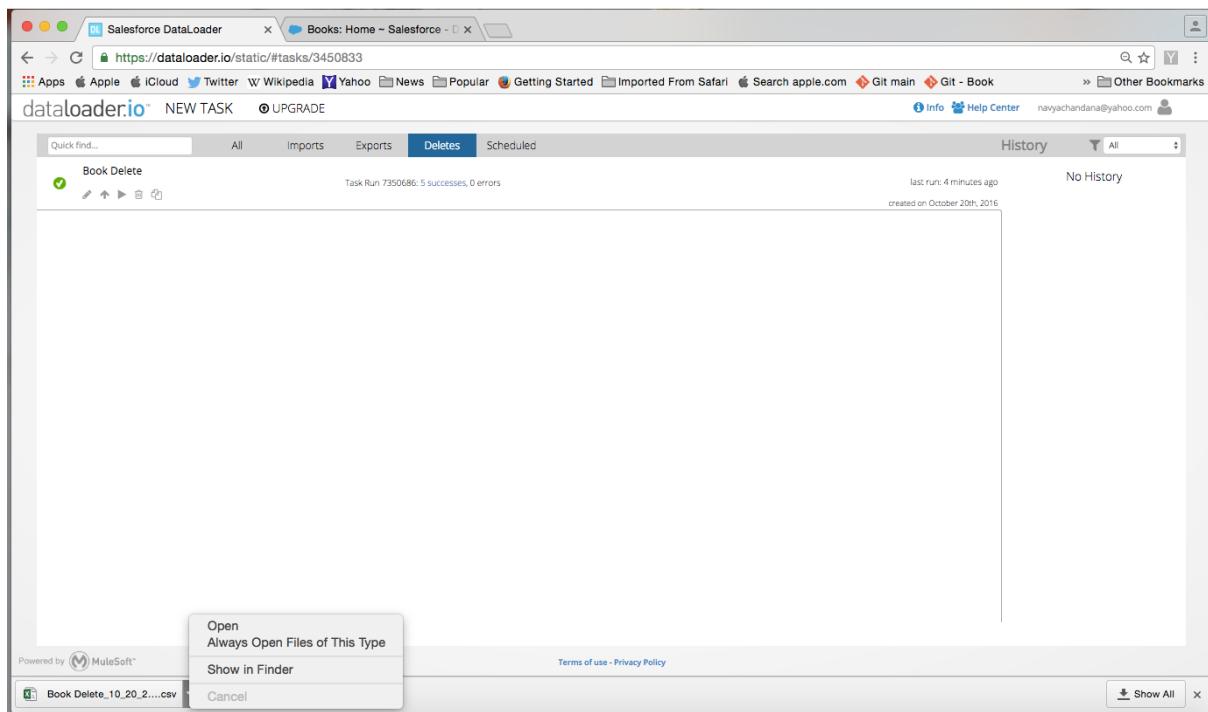

Step 7 : Task is Completed

Step 8 : Click on the task. The success file is downloaded

Step 9 : Open the success file

Step 10 : This is the delete success file. It shows which items are deleted.
